

OTTER BENCH TOP DIP SOLDERING MACHINE

The OTTER soldering machine has been specifically designed to meet the requirements of the smaller winding shop, and with its realistic price, brings the advantages of machine soldering within easy reach of all coilwinding companies. Interchangeable turret assemblies enable small batch runs of coils to be soldered quickly and economically, with a consistent quality that cannot be matched by hand dipping.

Specifications

Dimensions	50 cm x 50 cm x 30 cm h
Electrics	13 A, 240 V single phase
Temperature range	0 - 550 degrees C
Soldering time	0 - 9,9 seconds (digital readout in 0,1 sec.)
Cycle time	4-5 seconds (average)

Auto index model only

Compressed air supply 4 bar (60 p.s.i.)
Filter/regulator unit supplied on machine
